SUMMARY

An experienced professional with 6 years of data analytics experience gaining valuable transferable skills from financial, consulting and healthcare industries. Analytical, action oriented, and hardworking with a strong ability of utilizing critical thinking and teamwork to solve problems. Eager to leverage a diverse range of talents in a new exciting professional setting.

EDUCATION

University of Minnesota-Twin Cities — **Minneapolis, MN**
Bachelor of Arts, Major in Statistics, Minor in Economics — September 2016 – May 2020

- **Cumulative GPA:** 3.08/4.0; Dean's list Spring 2020.
- Area of Emphasis; Statistical Practice.
- **Relevant Coursework:** Intro to C++; Theory of Statistics; Regression and Correlated Data; Intermediate Microeconomics; Intermediate Macroeconomics; Introduction to Statistical Computing; Applied Statistics; Public Economics; Statistics Designing Experiments; Communication for Statisticians.

University of Iowa — **Minneapolis, MN(Online)**
Masters of Science, Business Analytics — August 2025 – Present

SKILLS

Languages: SQL, Python, R, C++, HTML
Libraries: Pandas, NumPy, Matplotlib, Seaborn, SciPy Stats, Polars, tidyr, Dplyr, ggplot, sqldf, rodbc
Databases: SQL Server, MySQL, Postgres, Snowflake, Teradata
Tools: VS Code, R Studio, Spyder, Jupyter Notebook, GitHub, Alation, Azure Data Studio, Dbeaver, Tableau, Microsoft Excel, Power Query, Microsoft Power Automate
AI Technology: Gemini, CoPilot, Azure AI foundry, GitHub Copilot, Claude, ChatGPT, Grok
Certifications: Azure Fundamentals, Azure Data Fundamentals, Northwestern 101: Leading with Analytics, Certificate of Competency in SQL, Tableau Desktop Specialist
Other: Teamwork, Critical Thinking, Problem Solving, Data Analytics and Reporting, Database Management, Leadership, Business Process Design, Statistical Analysis

WORK EXPERIENCE

Centene — **Minneapolis, MN**
Data Analyst — September 2025 – Present

- Converted complex legacy Teradata SQL queries into snowflake-compatible SQL, ensuring 100% data integrity and uninterrupted access for clinical reporting during the transition.
- Engineering optimized automated reporting workflows using Alation, reducing manual processing time by 3 hours per week and allowing the team to shift focus toward high-value predictive analytics.
- Optimized and refactored complex Teradata SQL queries for Snowflake's architecture, leveraging native functions and query tuning to improve execution performance by 40%.
- Collaborating with cross-functional teams to define business requirements for claims metrics, ensuring reporting aligned with CMS compliance standards and internal financial goals.

Optum — **Eden Prairie, MN**
Healthcare Economics Consultant — September 2024 – September 2025

- Enabled a 25% increase in reporting efficiency by optimizing database queries and streamlining data ingestion processes through the design of scalable Snowflake database architecture such as utilizing stored procedures to support real-time data integration from the Midwest and Mid-Atlantic care delivery organizations.
- Improving cross-departmental collaboration by facilitating monthly analytics presentations and resulting in the rollout of a $1M cost-reduction initiative.
- Streamlined the provider roster for the Midwest and Mid-Atlantic care delivery organizations in snowflake, automating manual processes and saving users 48 hours annually in manual patient list management.

Senior Healthcare Economics Analyst — January 2024 – September 2024

- Built and optimized snowflake reporting tables and stored procedures by aggregating data from internal sources of truth, reducing query delivery times by 30% and accelerating care delivery analytics.
- Developed Tableau dashboards to that identified $2M in potential cost savings by highlighting areas of opportunity across Midwest and Mid-Atlantic care delivery networks.
- Partnered with data engineers across different teams to design and maintain automated data pipelines, ensuring 99.9% data integrity and consistency across multiple sources of truth, while improving the accuracy and efficiency of enterprise-wide reporting.

Accenture — **Minneapolis, MN**
Senior Analyst — November 2022 – January 2024
Consulting Development Analyst — August 2021 – November 2022

Project Experiences

Data Scientist — August 2023 – January 2024

- Ingested over 1200 survey responses using Python and provided key insights on employee feedback to senior leadership.
- Applied statistical techniques such as standard deviation, bell curve and correlation to assess employee feedback and recommended a 2-4% average score increase for 2024 based on five-year trends.
- Processed and cleaned raw funding data using Python and developed an Excel dashboard to visualize funding distribution across offices and recipients over the past five years.

Data Quality Analyst — July 2022 – July 2023

- Developed SQL Queries for weekly refreshable Excel reports and automated follow-up emails to client project managers and enhanced data quality and integrity.
- Developed SQL Queries and data validations and utilized Excel tools such as Pivot Tables to generate reports and metrics that enabled stakeholders to understand business performance.
- Developed a Tableau dashboard for data cleaning in March 2023 that monitored 26 teams for data governance compliance, improve deployment timelines, cost savings, and budget optimization.
- Developed Excel reports using SQL to conduct monthly audits for data cleaning of 100+ projects which helped the client to maximize capitalization and save over $50 million in costs.

Business Analyst — January 2022 – June 2022

- Analyzed visit types using Excel to identify top patient visit reasons per center from 2019 to 2022 and created Excel visuals that prioritized five high-volume centers for CRM scheduling.
- Analyzed block usage data in Excel to determine peak scheduling blocks and created visuals and reports that led to the recommendation to remove underused blocks from 2021 and onwards.
- Supported clinical scripting workflow through scripting and analyzed keyword mapping in Excel to ensure accurate symptom matching within the CRM scheduling framework.

Data Analyst — September 2021 – December 2021

- Developed and automated data processes to integrate multiple sources that supported reporting and dashboard creation.
- Constructed data tables and views in Microsoft SQL Server for ETL and SSI package development to facilitate data migration.
- Created design documents, data tables and structures in the ETL development process and created test scripts that facilitated the data cleaning and data organization from ETL to the data migration.
- Loaded the data into the server for clean-up, end-to-end testing and migration to support dashboard building, reporting, and wireframe completion.

US Bank — **Saint Paul, MN**
Global Securities Specialist — June 2020 – August 2021

- Collaborated with clients and administrators to establish and oversee global trade accounts.
- Analyzed and corrected erroneous trade instructions in the market using SWIFT and inbound trade communications.
- Provided recommendations to global teams to align with client and business requirements.
- Contributed to internal projects at team-specific and global custody levels.
